Joe, I may have gone back to the site one or two more times in June but I am not sure about the dates. After that I was tracking progress at the site through my counterpart at PADEP. By September we had determined that there was no more need for EPA involvement in the site, so I closed out the site.

Subject: Miller Chemical

Greg,

Hello I am the new Financial Analyst in the Cost Recovery branch, and I wanted to introduce myself. I am starting on the Miller Chemical Fire site in PA, and I had some questions.

It says the completion date is September 1st 2015, but the last day we were on site was June 16th 2015. Did we go back to the site or was June 16th the last date? Thank you in advance

For answering my questions.

Have a great day

Joseph Geibler
